kevin-stratmeyer

Professional Summary

Full Stack Developer with Business Management experience. Versed in fast-paced customer-centric workflow in team-oriented environments. Adept at Python, Java and JavaScript, striving to find a tight-knit team focusing on pioneering products to improve people's lives.

Projects

Online Multiplayer Pong

September 2018

Recreated PONG utilizing web sockets to enable real-time multiplayer capabilities over the web. Spring Boot is employed for the server, MySQL for the database and three.js for the front-end graphics library.

- Pitched the idea with a team-member, recruiting 3 other developers to work in a team of 5.
- Developed the front and back end to the specifications of the game design while contributing to the creation of the database.
- Established a semi-agile team approach to tackle problems and resolve conflicts.

Workforce Webpage

August 2018

Designed and implemented a single page private team communication website. The first user to create an account becomes the page manager, who can then create more users or administrators who can then send private internal messages. Django is utilized for the backend, MySQL for the database and jQuery to make the AJAX calls keeping the website a single page.

- Mapped out the layout of the website and transformed it into HTML and CSS.
- Developed the back end to respond to requests responding with chunks of HTML that the front end can place depending of the current layout.
- Created a front-end using CSS, an HTML wireframe and JavaScript that can respond to response of the backend without having to change the site.

Professional Experience

Coding Dojo – Full Stack Resident

July 2018 - Present

Immersive full stack web development program. Graduated with over 1000 hours of coding experience and a working proficiency in HTML, CSS, Python, Java and JavaScript and numerous frameworks. Attained black belts (highest level of achievement) in all three stacks. (Python, Java, MEAN)

Boca Botanas - General Manger

March 2016 - July 2018

Grew from server, through bartender, to general manager. Checked on patrons to create a warm and family-like atmosphere. Organized coworkers to provide fast and effective service to clients, fostering positive work relationships and creating a positive work environment. Dealt with issues on both a day-to-day, monthly and yearly basis, ensuring the growth of the business.

Education

Boston University - B.A. in Computer Science

September 2013 - December 2015

Completed 56 credits. Focused studies in computer science, delving into topics such as Probability in Computer Science, modeling and analysis of concurrent processing, computational resource scheduling and consumption, performance evaluation techniques, memory management, etc.

Carnegie Mellon University

June 2011 - July 2011

Attended a 6-week summer camp where we learned to program, culminating in the creation of two video games.
